Far Infrared Rays are very helpful in reducing inflammation and relieving your pain.

Less hand pain is always good!

I've been meaning to get back to you regarding Prolotex gloves. The gloves have been working very well for me. Within two weeks of wearing the Prolotex gloves, I have noticed significant changes in the blood circulation of my hands. My hands are much warmer on a consistent basis, and do not turn to "ice cold" when touching cold items. These gloves are truly amazing and I cannot believe how quick I have had positive results. I've been searching for a solution to my problem of cold hands, and I've finally found it. Ryan R. S.

Improved circulation = **WARMER** Hands and Feet! Use Prolotex™ Gloves and Socks all year round!

Protect yourself from the cold.

All of our Prolotex™ Gloves help to stimulate the circulation in your hands and fingers. This will increase the overall warmth in your hands and help prevent them from getting so cold.
